

G20 celebrates its 20th anniversary

03/09/2017

"The future belongs to those who believe in the beauty of their dreams." (Eleanor Roosevelt)

This year **G20 celebrates its 20th anniversary**, a milestone for a company which, with passion and tenacity, has entered the field of national and international heating market.

But we celebrate especially the 20 years of activity of Marco Rapaccioli's, the founder of the G20.

Thanks to his entrepreneurial skills, he has been able to turn a dream, perhaps risky, into a solid company, in constant growth in turnover, employees, work spaces, business sectors, customers and markets.

During the first years of work, the main activity of G20 has been supporting small manufacturers in achieving the EC Certification for their products. We subsequently developed the part of engineering, by designing components, boilers or entire boiler ranges for major manufacturers, from Italy and from abroad. In recent years the leap was taken through the acquisition of two historical brands in the field of the national heating: AIR CONTROL in 2011 and GRUPPO IMAR just a few days ago.

We want to thank all the people we have worked with during this long period and who have helped us to grow and achieve this first goal.

Thanks everybody!
